

THE PLAY EXPERIENCE GUIDE

Soft
Play

Soft
Play

FROM CONCEPTION TO COMPLETION, WE BRING THE WORLD TO LIFE THROUGH PLAY.

Soft Play® has been the worldwide leader in commercial play experiences for over 35 years. We create innovative, cutting edge, and fully immersive play experiences. Our superior craftsmanship and unmatched creativity transforms play into the main attraction. With us, there are no limits on the imagination, only exceptional play experiences.

Our turnkey solutions are designed by the top designers in the industry and skillfully executed by an unmatched engineering team.

TWO PLAY PIONEERS COME TOGETHER.

In 2018, PLAYTIME® joined fellow play innovator Soft Play under the Soft Play banner. Together we create innovative, cutting edge, and fully immersive play experiences.

The PlayPower® family of brands has hundreds of years of combined experience bringing play and recreation to life. PlayPower brands are world leaders in indoor play, outdoor play, site amenities, water play, shade structures, site furnishings, net play, and safety surfacing. By leveraging the innovation from each of our brands we produce the most unique, cutting-edge, and highest quality play experiences inspired from locations around the world.

By partnering with Soft Play®, you partner with 11 industry leaders and receive the service experience of a boutique custom design and fabrication agency.

QUALITY AND SAFETY

Soft Play® approach to quality and safety begins long before the manufacturing process starts. From innovative concept development through prototype testing and installation, our experienced team delivers a high quality product that strictly adheres to safety and accessibility requirements.

Our materials are designed and engineered for ultra-tough and long-lasting performance to ensure that your play area stays in top shape for years after it is installed.

All our products meet or exceed safety standards including ASTM 1918 Standards for Soft Contained Playground Equipment, and we comply with the requirements of the Consumer Product Safety Improvement Act.

THEMED EXPERIENCES

Soft Play® team pushes the boundaries of what's possible, helping to transform spaces around the world. Our creative team includes industrial, graphic, and interior designers; 3D artists and illustrators all with unique ability to bring your vision to life through distinctive ideation and creative execution. With unparalleled talent and the latest in technology, we deliver unforgettable experiences for any budget and size.

KENNEDY SPACE CENTER

PLANET PLAY | MERRITT ISLAND, FL

Soft Play® partnered with Brian Morrow Productions to convert a 6,000 sq. ft. (558 sq. m.) large format theater into experiential play attraction. Planet Play is a multiple-story, fully immersive play experience for kids launched at the Kennedy Space Center Visitor Complex. Designed to create a memorable learning experience, Planet Play features numerous interactive gaming, physical challenges and artistic sculptures so children can explore and learn about solar system in a new and engaging way.

CHERRY CREEK MALL

DINOSAUR GULCH | DENVER, CO

Dinosaur Gulch children's play area was introduced at Cherry Creek Shopping Center to encourage interest in nature and science. This immersive experience features a dinosaur-themed Soft Play® play area created alongside paleontologists and curators from the Denver Museum of Nature & Science. Soft Play's artists worked closely with the museum's experts to create dinosaurs that were based on reality while remaining kid-friendly.

LOTTE WORLD ADVENTURE BUSAN THEME PARK

JACK AND THE BEANSTALK | SOUTH KOREA

Soft Play® turned 3,000 sq. ft. (270 sq. m.) space into a Jack and the Beanstalk attraction, which includes a two-story climbing castle from which Lotte World mascots Lotty and Lorry both make an appearance. This play area also includes a sculpted giant and other play-on sculptures designed to be soft to the touch and naturally anti-bacterial and anti-fungal. This project marks Soft Play's third major collaboration with the team at Lotte World.

WOODLAND MALL

MONSTER PLAY | GRAND RAPIDS, MI

A new monster themed play experience features a tower and soft sculpted play elements designed to entertain both toddlers and early elementary age children. The space features comfortable seating and interactive features for adults as well.

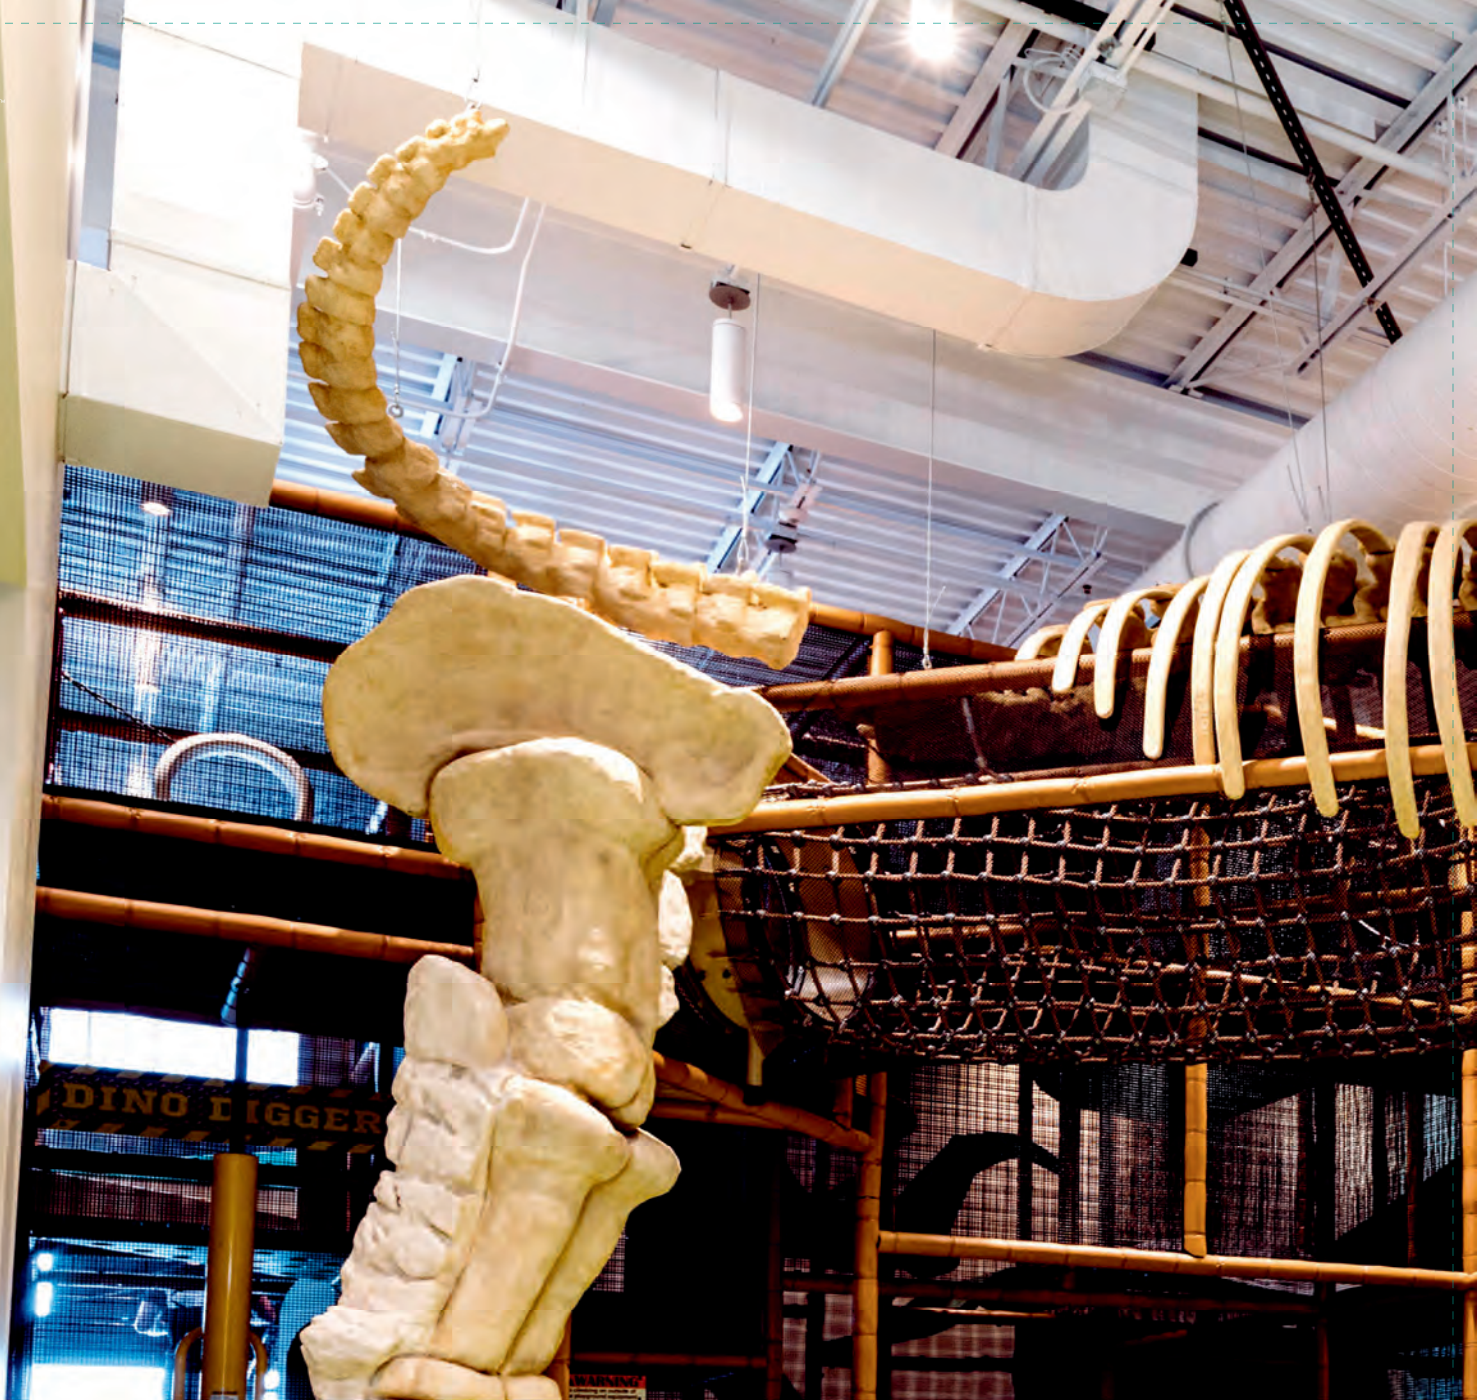

COLORADO MILLS MALL

SPACE EXPLORATION | LAKEWOOD, CO

The Colorado Mills Mall desired to create a space for children to explore the many facets of Mars and space travel in this Mars Outpost themed play area. Kids can play on rockets, ride a land rover and try their digital skills on the interactive wall. The exploration and imagination don't stop there but continues with playing inside the dunes, sliding down a solar panel and looking up to see other planets they can someday explore. There are special seating areas where parents can take a break and watch as their children become astronauts or space explorers.

TRAILWINDS RECREATION CENTER

DINOSAUR THEME | THORNTON, CO

This play area design was inspired by real dinosaur bones found in Colorado. It was built with all things dinosaur in mind, from dinosaur-themed obstacles to outside impressive theming. A stunning 16 foot (4.9m) tall triceratops skeleton is a great focal point drawing children and families in to play.

A young child with a joyful expression is sitting on a large, bright red, bear-shaped inflatable. The child is wearing a vibrant red hooded jacket over a dark long-sleeved shirt with a subtle pattern, and a green knit hat with a grey stripe. They are also wearing dark camouflage-patterned pants and black boots. The child's hands are resting on the side of the bear. The background features a large window that looks out onto a sunny day with trees displaying autumn foliage in shades of yellow and orange. The floor is covered with a blue and grey patterned carpet.

BRAND EXPERIENCES

We help brands stand out and win. We work with well-known brands to help them create experiences that facilitate deeper connections, inspire audiences, and ultimately deliver results. Together, we can make a big impact on your brand.

Soft
Play

THE LEARNING EXPERIENCE

EARLY EDUCATION | MULTIPLE LOCATIONS

In collaboration with The Learning Experience, we designed exclusive wall facades to create a unique play experience within their schools that brings their brand to life. These 3D wall semi-sculpted facades became a signature piece and an extension for their brand for over 15 years. TLE® preschoolers have opportunities to help make sense of the experiences learned in the classroom by practicing skills in the Make Believe Boulevard, and develop an understanding as to who they are while learning to care about others.

LEGOLAND DISCOVERY CENTERS

DISCOVERY CENTER | MULTIPLE LOCATIONS

Soft Play® produced a series of exceptional indoor play experiences that pushed both the play environment and LEGOLAND® branding to the next level. We delivered a look, play value and quality that matched LEGOLAND branding. Our unique interactive structures, colorful graphics and vivid characters brought LEGO® City Train Station and Ninjago® themes to life and tested the limits of kids' physical skills and imagination.

MCDONALD'S PLAY EXPERIENCE

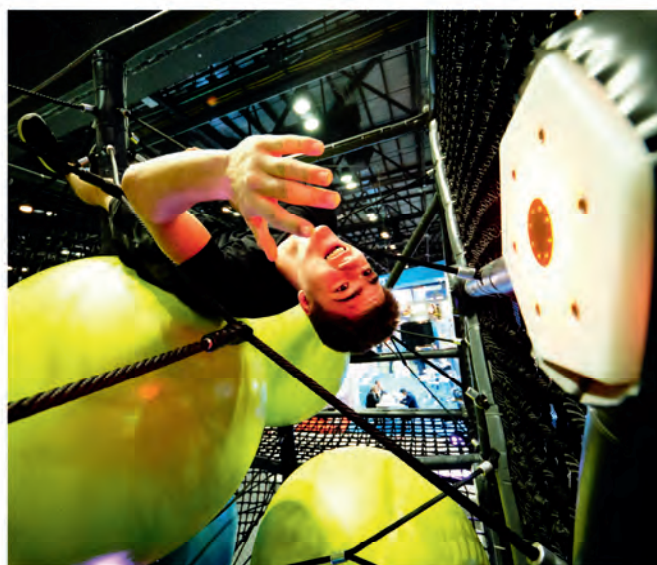

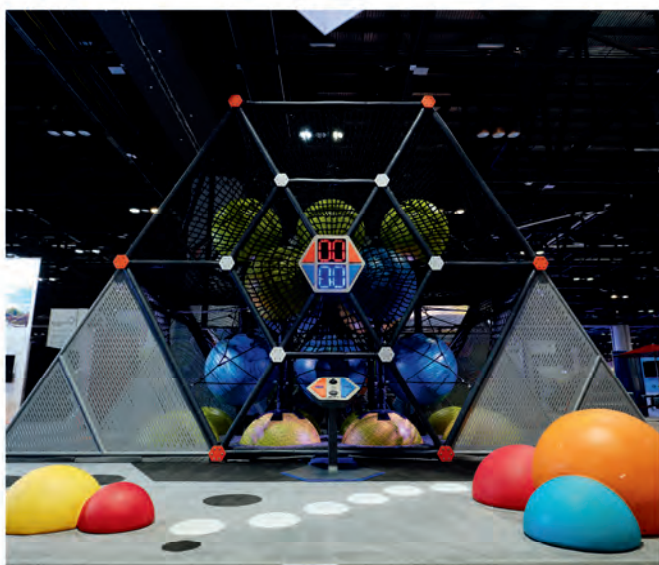

A child with blonde hair, wearing a dark blue t-shirt and blue corduroy pants, is crouched low to the ground. They are wearing colorful patterned socks and sneakers. On their left wrist, they have a pink wristband with a small device attached. The floor beneath them is illuminated with a bright pink and yellow light, suggesting an interactive sensor or game element. The background is dark with some blue and purple lights, possibly from a play area or stage.

GAMIFIED EXPERIENCES

Our cutting-edge, interactive challenges are designed for thrill-seeking kids and young adults. They push the limits of the body, activate the imagination, and dazzle the senses, all while maximizing throughput and delivering results.

THE HIVE

GAMIFIED OBSTACLE COURSE

The Hive is an innovative, interactive obstacle course that challenges the cognitive and physical skills of young adults by gamifying the competitive experience. Its innovative hex structure houses a broad spectrum of challenges uniquely designed to push the limits of the body, engage the imagination, and dazzle the senses.

FOOTPRINT: 28.5' (8.7m) x 9.7' (3m) x 16.6' (5.1m)

ACTIVE INTERACTIVE PLAY

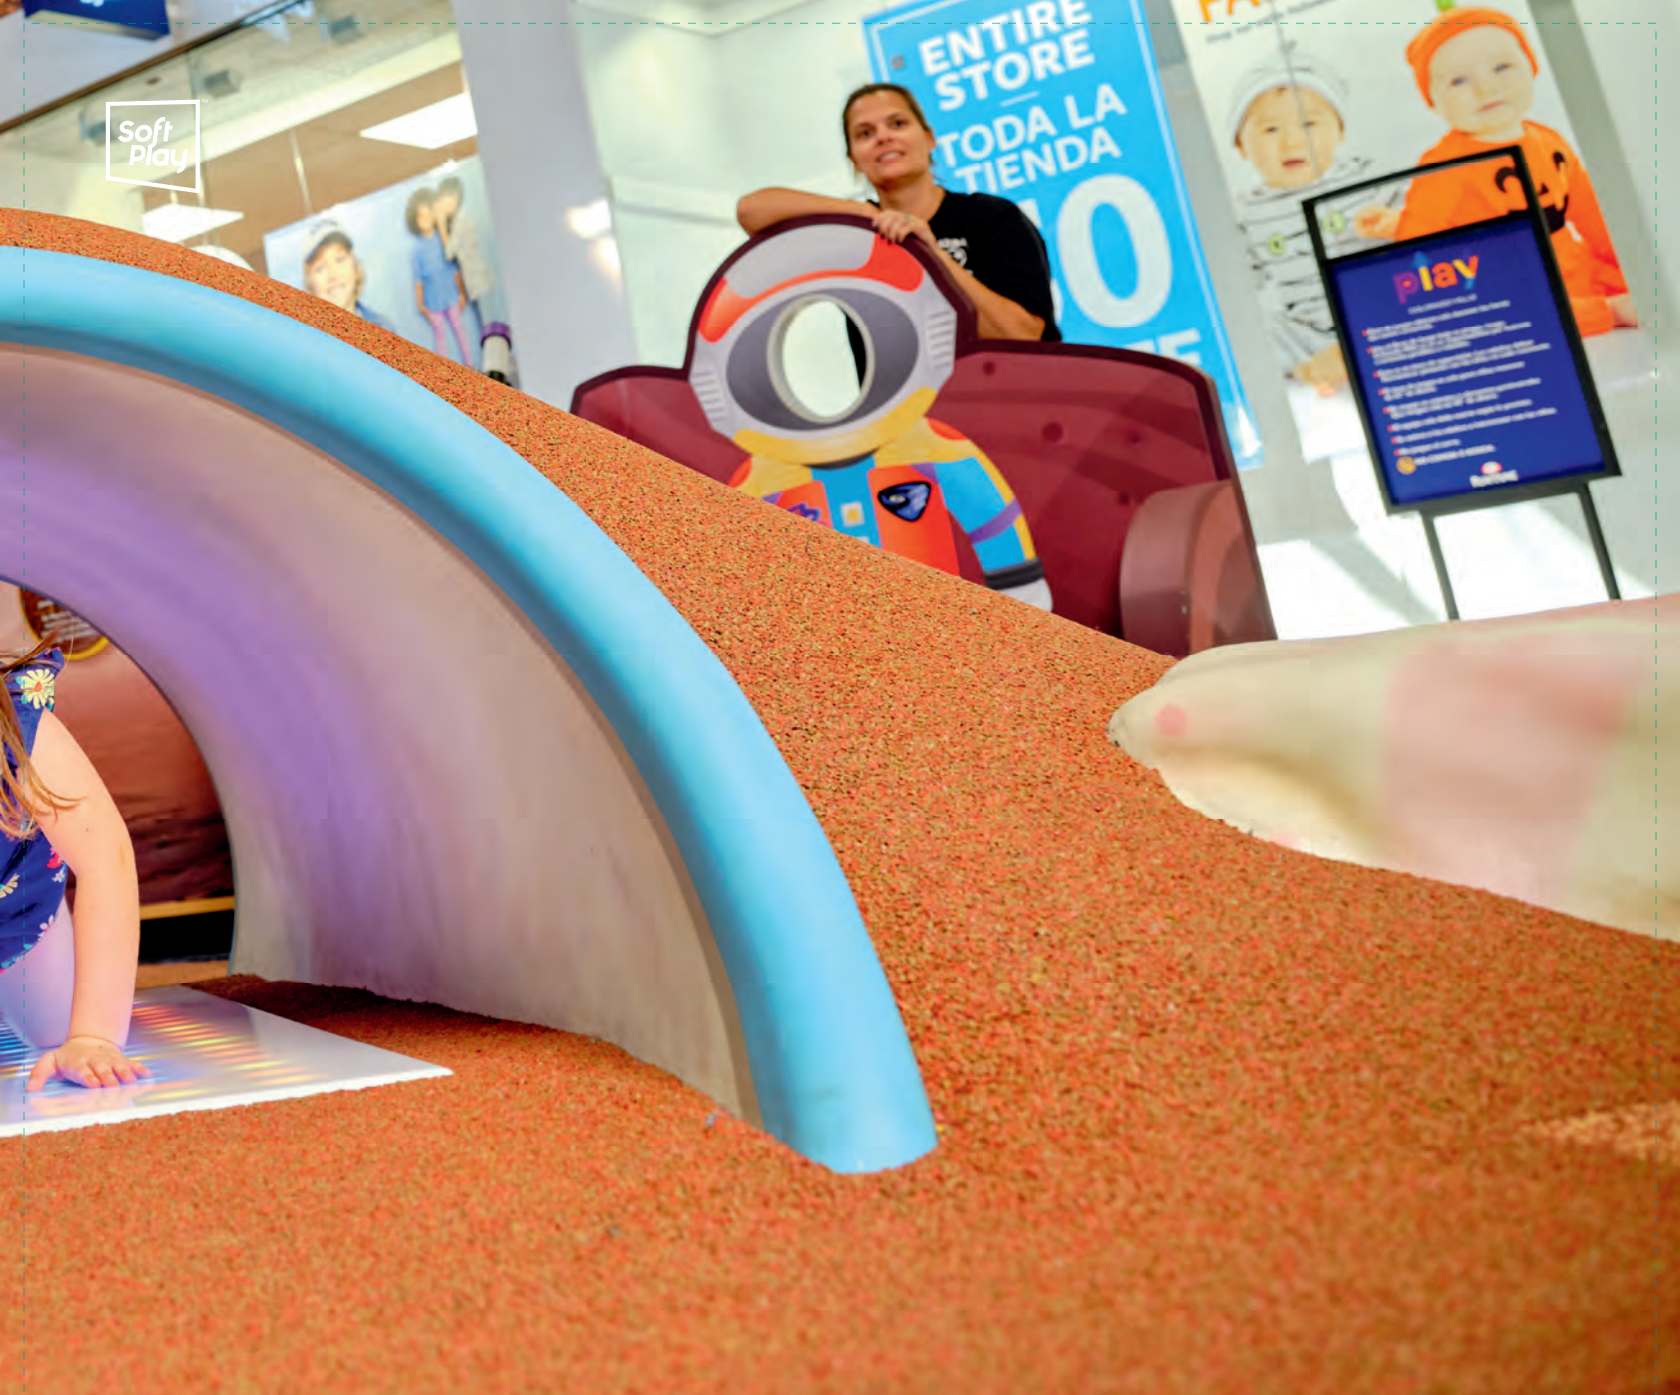

This interactive attraction packs a ton of action into a small space. Not only does it get kids moving, but adults can partake in the challenge too – making for a fun, multi-generational experience. If you can tap your toes, you can start using this play equipment to have a world of fun!

FOOTPRINT: 5'9" (1.75m) L x 5'9" (1.75m) W x 7'2" (2.17m) H

ELECTRICAL REQUIREMENTS: 120V, 5' (1.5m) cord

NO SURFACING REQUIRED

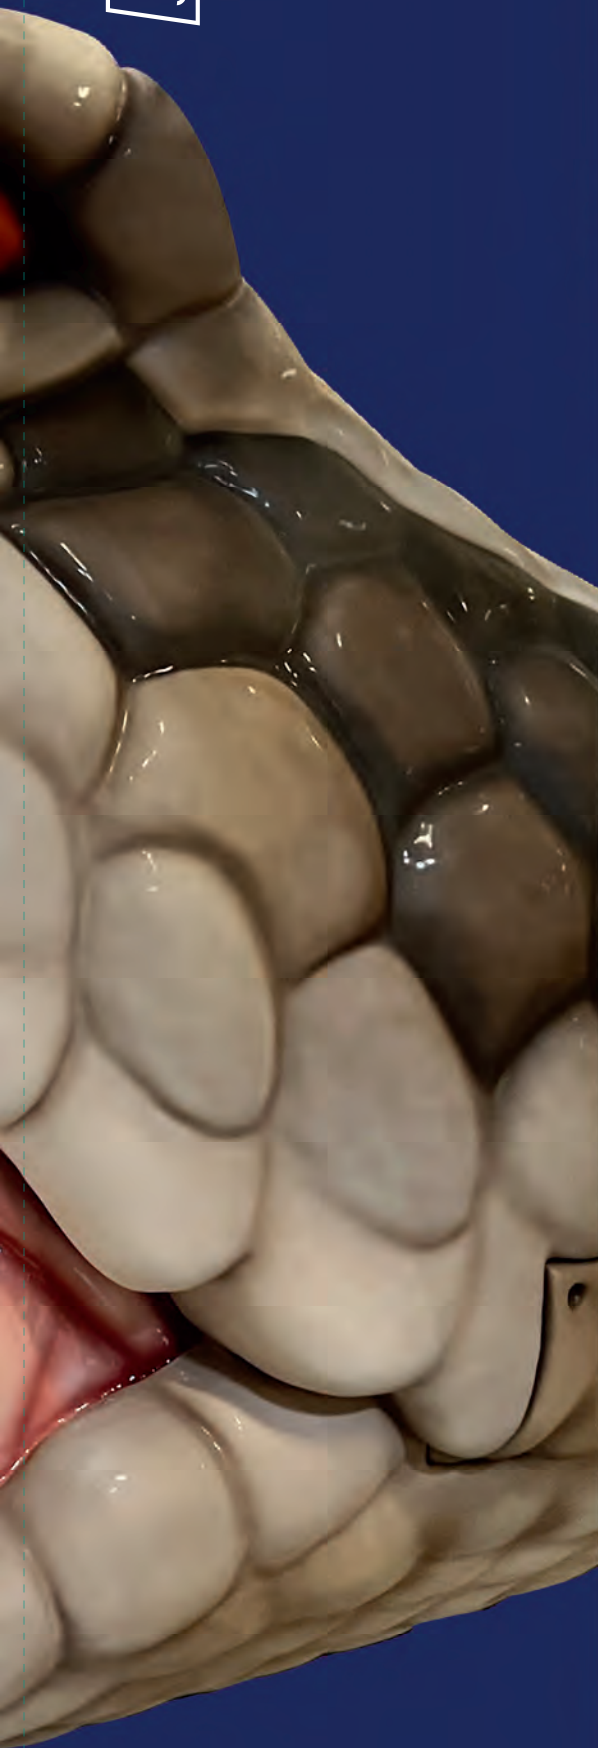

CUSTOM DIGITAL EXPERIENCES

We design custom digital and gamified experiences for a variety of clients. All of our digital experiences are made to last in high-traffic environments and withstand anything kids can think of. With over 35+ years of building play experiences for children, we know what kind of digital experience will work for your space and what will deliver on your short-term and long-term play area goals.

ADVENTURE EXPERIENCES

Create a revenue-generating attraction the whole family will enjoy. At Soft Play we do more than just manufacturing play areas and challenge courses – we create an entire adventure experience for the whole family.

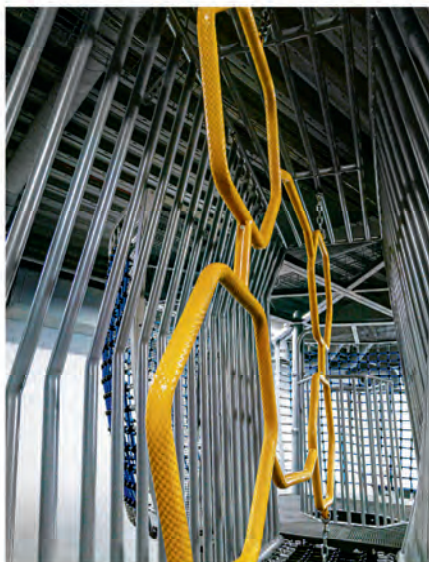

CENTER OF RECREATION EXCELLENCE

NON-BELAYED ADVENTURE COURSE | HOBBS, NM

This play area became the centerpiece for the Center of Recreation Excellence, multi-use, multi-generational, 158,000 sq. ft. (15,000 sq. m.) indoor complex. Designed together with the City of Hobbs and a leading architectural firm, this adventure course pairs together a non-belayed adventure system with an engaging toddler play area. SKYCOURSE features three 38-foot-tall (11.6m) towers, enclosed skyways, a climbing maze, and two sky high stainless-steel spiral slides, all with a 297-child play capacity.

OREM FAMILY FITNESS CENTER | OREM, UT

PLAY FOR ALL

Space and budget should never stop you from bringing play to all. We have solutions for any space and any budget.

Soft Play® was the first company to offer upper-level ADA access to our play systems. Enabling all children to have access to play events contributes to our culture by inclusion and fosters a more diverse community.

A young boy with dark hair, wearing blue and white checkered shorts, is captured mid-air as he jumps over a water obstacle. The obstacle consists of several large, orange, rock-like structures in a pool of water. Above him is a rope climbing structure with white ropes and blue handles. The background shows a sunny day with green trees and a blue sky. A purple umbrella is visible on the left side of the frame.

WATER PLAY EXPERIENCES

Differentiate your water park with unique and memorable commercial aquatic attractions. From making a big splash to challenging your guests to walk on water, Soft Play® water elements get your guests off the sideline and into the pool. All of our sculpted water elements are finished with a UV and chlorine-stable, abrasion-resistant, HydroTuff coating. HydroTuff is specifically designed for environments that require resistance to high acid and alkali (chlorine) conditions.

MASSANUTTEN RESORT | MASSANUTTEN, VA

FLOATABLES | WATER WALKS | SPRAYERS

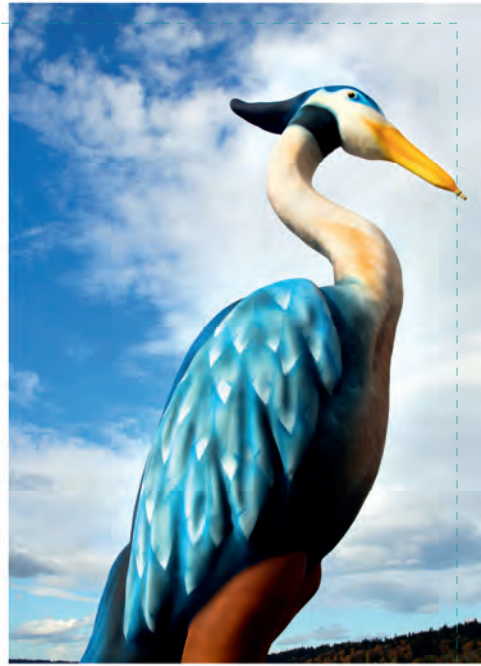

OUTDOOR PLAY

Soft Play® outdoor play sculptures and contained playgrounds provide a fun, durable and memorable way to add a focal point to your outdoor space. Easy to clean and maintain, the Glass Fiber Reinforced Polymer (GFRP) construction of play sculptures is very strong and able to withstand more than two tons of pressure per square inch. Each component is hand painted and the vibrant colors are UV stable and fade resistant. All materials used in contained playgrounds are engineered to withstand even the toughest outdoor environments.

OUTDOOR PLAY

Soft
Play

SCULPTED FOAM

What separates our soft sculpted play elements from other indoor play options is that they are soft to the touch and built to last. Each sculpt features an EVA Foam layer and is coated with an extremely durable rubber-like substance that makes it uniquely soft and safe. We craft our soft sculpted pieces with a natural antimicrobial surface that both helps repel germs and is easy to clean, ensuring a healthy play environment for kids.

FIBERGLASS ▶▶▶▶

SCULPTED PROCESS

Crafted to perfection, all of our sculpted foam elements are handcrafted in the USA at our Colorado facility.

Our artisans are masters of their respected crafts, producing exceptional quality work that lasts for years. We use only the highest quality materials to produce extremely durable play elements designed to withstand the most rigorous play and high traffic environments.

SCULPTED FOAM STYLE OPTIONS

Our talented production artists can create enchanting play areas using a wide variety of different techniques. From the style of the design to the unique way each element is painted, we categorize our style options into four different classifications.

ABSTRACT & CONTEMPORARY

Dive into the abstract with designs that use a visual language of shape, form, color, and line to create stimulating compositions. These ambiguous, geometric, and free flowing elements encourage free play and challenge a child's creativity.

BRANDED & LICENSED

From capturing the essence of your brand to bringing your favorite characters to life, we can help you transform your brand into the next picture-perfect moment.

WHIMSICAL

Capture the essence of play with our most popular style. Whimsical elements create a fanciful look with animated facial expressions providing a joyful, playful appearance.

SEMI REALISTIC

Giving elements a lifelike feel, our semi-realistic style intricately dramatizes shapes and details textures to emulate real-life objects. This style engulfs children in realistic environments, stimulating explorations, and creative thinking.

WONDERSCAPES

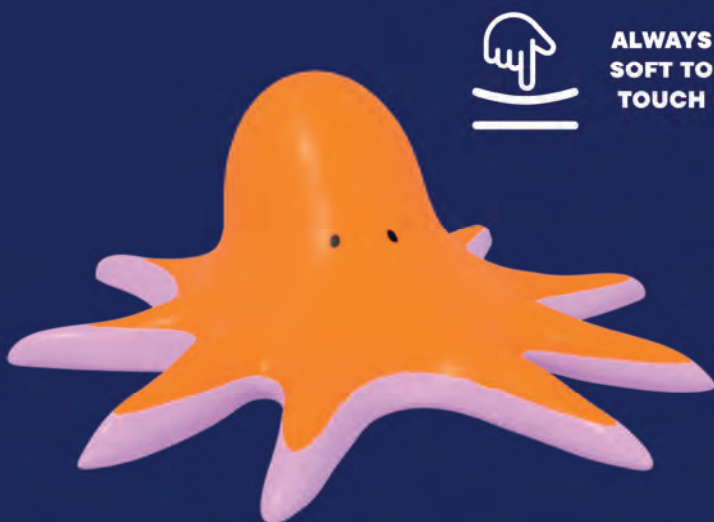

The Wonderscapes were designed to look appealing in any space, but also extremely functional and durable. The Creative Design Team at Soft Play® chose colors that are organic and natural, but also include a touch of vibrancy to compliment any space.

NATURAL ELEMENT COLLECTION

The Wonderscapes feature our natural frame contained play system. The warm wood post frame is engineered for long-lasting performance with minimal maintenance. A more compact design maximizes space while increasing play value.

SOFT SCULPTED FOAM

Hand sculpted and painted by our talented in-house artists. Durable, antimicrobial surface that can withstand even the toughest environments.

SAFETY SURFACING

No play area is complete without safety surfacing. At Soft Play®, we're dedicated to providing the best playground flooring, offering a range of high-quality, impact-absorbing surfacing options. All of our surfacing solutions meet ASTM F1951 ADA accessibility requirements.

DURASOFT SAFETY FLOORING

DuraSoft Safety Flooring System was designed to activate the floor space while providing a safer environment for children to play and imagine.

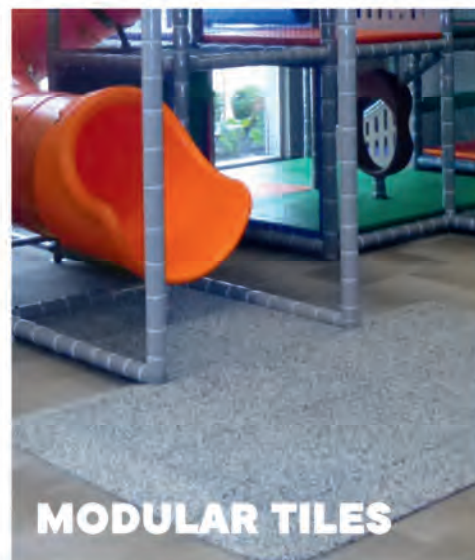

- Features liquid-proof pad that keeps spills and accidents at the surface and commercial-grade carpet with Lifespan backing.
- Flooring design creates more opportunities to play and challenge kids imagination.
- Easy to install due to the simplicity of the design.
- 1.5" (38mm) rated at 5' (1.5m) fall height under ASTM F1292.
- Easy to clean and maintain.

POUR IN PLACE SURFACING

Mixed on-site and fixed in place on your playground, this durable and quality surfacing option comes in a variety of colors and patterns to match your themed play area or playground. This rubber flooring can be easily formed into different shapes, making it a favorite of commercial customers.

MODULAR TILES

For an above grade solution that is great for existing locations, these 2' modular tiles are easy to install and maintain.
